

NightSabre NS-60W | SEC3000

Ultra Bright Low-Profile Weatherproof IP65 LED Security Light

NightSabre low profile security lights deliver the very latest in high brightness LED technology in a sleek and discreet weatherproof form. At only 32mm high these beautifully crafted aluminium devices can fit under a windowsill, above a door or under the eaves of a roof.

Capable of detecting human movement up to 9m away, once triggered 1400 lumens illuminates a wide area with a bright even beam. As an additional deterrent there is a flashing red LED warning light to indicate the presence of an active security device. An integrated photocell ensures the light operates only after dusk.

The light is powered by a plug in power supply (included), and the power lead can be easily routed through a window opening or through a small hole in the wall or eaves. Installation is quick and simple and there is no need for any adjustments or maintenance - NightSabres are guaranteed for 2 years. Replacing incandescent bulbs with LED units lowers greenhouse gas emissions and saves electricity - the LEDs will last 10-20 years depending on use, so there is a very low total cost of ownership.

NightSabre can be connected directly to most garage door operators' AUX port*.

**Please check your operator's manual for compatibility.*

- Low voltage 12V DC
- Digital PIR motion sensor
- Flashing warning LED
- Dusk/dawn sensor
- Weatherproof IP65 rated
- Ultra bright LEDs
- Aluminium alloy
- Discreet design

SPECIFICATIONS

Voltage	12V DC 1.0A
Power	1400 lumens
Range	Up to 9m
Detection zone	120H x 90V
Recommended mounting height	2 - 4.5m
Dusk point	20 lux
Weatherproof rating	IP-65
Dimensions	580mm x 32mm x 30mm
Operating Temperature	-20C to +50C
Weight	425g
Energy rating	A+
LED lifetime	30,000 Hours
LED Colour	4000K Cool White
Approvals	FCC, CE, RoHS
Accessories	2m extension cable (SEC3002)
